WaveOne® Gold

Surf the canal
with confidence

 **Dentsply
Sirona**
Endodontics

Engineered with the latest reciprocating technology

The single-file simplicity of WaveOne® is now enhanced in WaveOne® Gold. Made with advanced metallurgy, it is the next generation of performance from Dentsply Sirona.

- Increases patient safety,* while reducing shaping time across a wide range of cases**
- Optimized with enhanced design features by leading endodontists
- Part of a complete solution that includes obturation products designed to match the shapes created by WaveOne® Gold files
- The WaveOne® Gold family now includes a single glide path file with reciprocating motion for simplicity from the start

WaveOne® Gold

Simplicity for you, safety for patients

Reinforces patient safety

- Primary WaveOne® Gold file is 50% more resistant to cyclic fatigue than WaveOne® Primary file
- Reduced screwing effect** compared to standard rotary systems

Covers a wider* range of canal morphologies

- Enhanced file flexibility thanks to the Gold technology
- Extended size range (Small, Primary, Medium, Large)

Shortens the shaping time

- Takes the cutting efficiency to a higher level
- A single file per treatment also translates into time savings for canal shaping and irrigation

Cyclic fatigue resistance**

Flexibility**

Shaping working time**

The design team speaks – Dr. C. Ruddle, Dr. J. Webber, Dr. W. Pertot, Dr. S. Kuttler

Shaping canals has never been easier

Since its launch in 2011, Dentsply Sirona's WaveOne® has set a new standard in root canal shaping. All around the world general dentists and endodontists have voiced their appreciation of the simplicity WaveOne® brings to their efforts to provide quality endodontic treatment to their patients.

We have created a new and exciting generation of WaveOne® to bring you WaveOne® Gold.

WaveOne® Gold brings to the endodontic procedure a metallurgically advanced single-file technique for shaping canals. Further, we optimized the tip diameters, tapers, and the cross-section to produce a file that really improves safety, efficiency and flexibility when preparing canals. WaveOne® Gold takes simplicity and treatment success to another level.

One complete solution

The WaveOne® Gold family of products provides a comprehensive treatment solution to promote confidence and predictable shape.

Motors

X-Smart® Plus and X-Smart IQ™ are pre-programmed for use with WaveOne® Gold for simplicity

Glide Path

The WaveOne® Gold Glider optimizes your glide path before shaping with WaveOne® Gold Primary**

Shaping

WaveOne® Gold shaping files are available in four sizes with three working lengths (21, 25, 31 mm) to treat a wide range of cases

Obturation

Dedicated WaveOne® Gold obturation products include paper points, variable tapered Conform Fit™ gutta-percha points and GuttaCore® Crosslinked Gutta-Percha Core Obturators

WaveOne® Gold Glider

Create your path with confidence

This new single glide path file has been designed in collaboration with a team of endodontist experts : Dr. E. Berrutti, Dr. G. Cantatore, Dr. A. Castellucci, Dr. S. Kuttler, Dr. W. Pertot, Dr. C. Ruddell, Dr. J. Webber, Dr. J. West.

Optimize your shaping preparation with a single reciprocating glide path file that is part of the WaveOne® Gold solution.

- Respects the natural shape of the canal
- Increases patient safety with enhanced flexibility and resistance to cyclic fatigue
- Sterile and ready for single use, which preserves cutting efficiency, reduces breakage and prevents cross contamination

The WaveOne® Gold Glider is only for use in reciprocating motion with compatible Dentsply Sirona motors. Helpful pre-programmed motor settings are available.

Lower bending resistance than PathFile, for an increased flexibility thanks to the gold heat treatment**

Better resistance to cycle fatigue**

Expanded selection of corresponding products

With the addition of a glide path file, WaveOne® Gold gives you the convenience of an entire family of products designed to work together, right from the start.

Original WaveOne® Gold family of products

Expanded WaveOne® Gold family of products under our new Dentsply Sirona branding

One sequence for most of your cases

The new gold standard of gutta-percha introduced for WaveOne® Gold

Conform Fit™

WaveOne® Gold Gutta-Percha Master Cones are latex-free and reformulated to match the precise shapes created by the WaveOne® Gold instruments.

- Improved heat transfer up to 4mm
- Variable taper
- Precise fit and accurate tug back
- Latex free for patient safety
- Part of a system based solution

Superior apical gutta-percha point filling volume**

Clearly identifiable: same color code as the file. 4 sizes (small, primary, medium, large) and improved dimensional stability up to 40% compared to traditional hand rolled gutta-percha with the related WaveOne® Gold files.

Paper points and GuttaCore® for WaveOne® Gold

Paper points

- Paper points are packaged in individual sterile packs of 5 points
- Ready to use, part of a total system solution for simple identification

GuttaCore® for WaveOne® Gold

GuttaCore® obturators feature a crosslinked gutta-percha core that sends the surrounding warm, flowable gutta-percha 3-dimensionally to follow the natural canal anatomy.

- An efficient technique that offers the ease of a single insertion, so your patients spend less time in your chair.
- The flowability of warm gutta-percha to achieve a complete fill throughout the canal system.
- The confidence of knowing GuttaCore® travels where traditional cold gutta-percha stops short.
